Description:

Structure: Bollard made of Sendzimir galvanized steel round tube Ø mm. 100 with a flat head of equal diameter at the apex. Round sheet metal plate shaped with laser technology diameter mm. 200x60/10 thick. Equipped with a pair of eyelets for chain connection and reflective band according to current legislation. Finishing: The galvanized steel parts first undergo a pre-treatment process of degreasing impurities through vapor solutions, subsequently dried and subjected to painting operations using electrostatic guns which cover the pieces with powder paint in a floury state. Subsequently, the product is subjected to oven polymerization, that is, a process that allows the powder to solidify by cooking at a temperature of 180/200° C in a hot air circulation oven. The pieces that come out of the oven are cooled naturally. The powders used in the painting process are non-toxic according to current regulations. RAL color at the customer's discretion. Dimensions: Ø 20 cm /10 x 100 h Anchoring: floor level.
