

Catalogue: **Urban Furniture**

Category:

Code: **PE30045**

Description:

Fence entirely made of 100% recycled plastic, composed of vertical posts (diameter 15 cm x H 150 cm with 2 through holes) and circular cross-section crosspieces internally reinforced with a St37 steel core to avoid breakages or unpleasant bending. The fence is equipped with hot-dip galvanized steel fixing systems.

Available in two versions:

- Version 1 with 225 cm wheelbase
(2 horizontal poles with a diameter of 8 x 225 cm with 1 vertical pole every 225 cm)

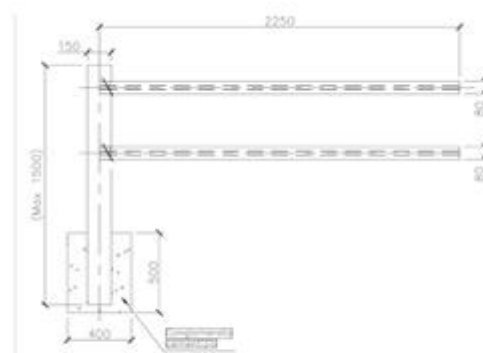

- Version 2 with 140 cm wheelbase
(2 horizontal poles with a diameter of 8 x 280 cm with 1 vertical pole every 140 cm)

Technical features: It requires no maintenance, no use of impregnating agents, resistant to water and atmospheric agents with colors that remain unchanged over time, respectful of the environment and non-toxic, free of splinters and resistant to bacteria, fungi and mould. It is not bitten and chewed by animals.

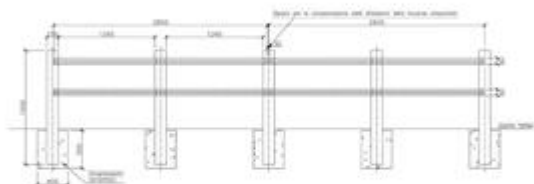

Notes:

It is very important to leave about 2 cm between one horizontal and the other to compensate for the expansion of the recycled plastic.
