Description:

Professional dome gazebo.

The square gazebo, thanks to its sturdy galvanized steel structure and the harmonious domed roof, is the ideal solution for hosting events, but also suitable as a reception or to embellish the garden, customizable through digital prints.

Tubular frame  $\varnothing$  80 x 1.5 / 2 mm, columns and oblique crosspieces in tubular  $\varnothing$  60 x 1.5 / 2 mm, adjustable feet and galvanized screws.

Cover and sides in coated PVC gr. 650 / sqm fireproof cl.2.

The basic 3X3 version can be easily installed by 2 people in about 20 minutes.

This type of gazebo can be completed with:

- Union eaves in PVC or sheet metal
- Lateral
- Pegs with relative tensioners and tape
- False ceiling
- Internal blinds
- Ballast

Available in different sizes and can be used both individually and coupled by joining eaves, creating linear or square compositions.

- 3x3 version - column height (E) 2.20 / 2.50 mt. - total height (D + E) 3.03 / 3.33 mt. - covered area 9.00 square meters.

- 4x4 version - column height (E) 2.20 / 2.50 mt. - total height (D + E) 3.25 / 3.55 mt. - covered area 16.00 square meters.

- version 4.9x4.9 - column height (E) 2.20 / 2.50 mt. - total height (D + E) 3.48 / 3.78 mt. - covered area 24.00 square meters.

- 6x6 version - column height (E) 2.20 / 2.50 mt. - total height (D + E) 3.56 / 3.86 mt. - covered area 36.00 square meters.

\* 6X6 has a reinforcement bar
