

Catalogue: **School and Community Furniture**

Category: **Projector Screen**

Code: **BL21011**

Description:

Video projection screen, made in Italy, manual with spring unwinding and rewinding mechanism.

The size of the box is very small, 6.5 x 6.5 cm, allowing a perfect insertion in any location while being minimally invasive.

The black box is extremely elegant. Made of black epoxy lacquered iron, it can be fixed to the wall or ceiling leaving space for different positioning combinations.

Installation is simple, the fixing holes are integrated at the end of the box on both sides.

The spring mechanism allows the canvas to be locked every 10 cm, and does not require any wall or floor stop for locking.

Despite being an entry level product, it is a projection screen with an excellent quality / price ratio.

Mounts white canvas with black back - called Shield - with 1.2 gain ratio. The viewing angle is 150 °.

The canvases used for this screen are in PVC. It is an M1 certified high-reflectivity fireproof type canvas and is used for frontal projections.

Net projection light:

- 155 × 155 cm, with a projection diagonal of 86 inches.

- 200x150 cm.
