

Catalogue: **Park & Playground Equipments**

Category: **Safety Surfacing**

Code: **PE33055**

Description:

Internal corner joint for anti-trauma flooring, an effective tool for preventing accidents, significantly reducing the impact with the ground, totally eliminating the risk of slipping.

The draining material is obtained from the fraying of recycled rubber granules, bound together by polyurethane resins.

It is used as a terminal element of the pavements to avoid risks due to stumbling in the case of funds not embedded in the ground.

Dimensions 50x50 cm.

Available colors: red-green-gray
