

Catalogue: **Park & Playground Equipments**

Category: **Safety Surfacing**

Code: **PE33014**

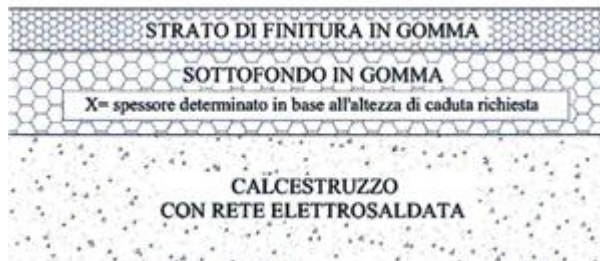

Description:

Shockproof flooring cast in place. The flooring consists of EPDM and recycled rubber granules from worn-out tires, is highly draining and dries very quickly.

Thanks to the cast in place, it is possible to create complex designs without the typical tile joints, and the wide variety of colors allows an infinite variety of combinations.

This flooring complies with the UNI EN1177 standard relating to shock absorption.
