

Catalogue: **Park & Playground Equipments**

Category: **Safety Surfacing**

Code: **PE33034**

Description:

Anti-trauma flooring in recycled plastic with excellent durability and comfort. Suitable for use on grass, however it can be used in many other environments, it can be used on flat or inclined surfaces. Thanks to its high anti-slip properties and impact absorption, it is suitable for play / activity areas. The rubber modules can be anchored to the ground using plastic pegs and connected to each other using clamps. We recommend the use of 12 pegs and ties per form. Certified up to a height of fall (HIC) of 3m.

Dimensions:

Module size: 150 x 100 cm

Thickness: 2,2 cm

Notes:

Only purchases for multiples of 1.50 meters.
