Catalogue: **Urban Furniture**

Category: **Trash can**

Code: **PE21121**

Description:

All-metal container consisting of two shells, hinged together, which isolate the containment compartment for the collection bag. A bag dispenser for 400 units is placed in the front part. This module, mechanically separated from the base structure, is equipped with a windowed door for bag collection. The trash can be installed anywhere easily on an existing pole or on a wall. On request we can supply the steel pole to be buried or a self-standing pedestal. All closures are protected by triangular key locks.
